

## Public drop-in: changes to Dove Cliff Weir

**The Environment Agency will be holding a public drop-in event to update the local community on changes to Dove Cliff weir.**

The Environment Agency is working to restore the River Dove to improve biodiversity and improve fish passage from the River Trent, through the entire Dove catchment - by removing the first obstacle to fish migration on the River Dove.

Removing the Dove Cliff Weir will open up over 30 miles of migratory habitat for fish and other species.

All are welcome to come to:

- Find out about the weir removal – what we are planning and why
- What the work will involve
- How the river will be improved and look after the work
- Share your knowledge on this stretch of river
- Provide feedback

**The public drop-in event will be held on:  
Thursday 29 November 2018, 2pm - 7pm  
at Dovecliff Hall Hotel (Charrington Room)  
Dovecliff Road, Stretton, Burton on Trent  
DE13 0DJ**

There will be information displays and representatives from the Environment Agency, and design and construction consultants GBV, available to answer questions at the event.

Further queries can be directed to the Environment Agency's Engagement Team via email: [Engagement\\_WestMids@environment-agency.gov.uk](mailto:Engagement_WestMids@environment-agency.gov.uk) or 0203 025 1583
